

INDIAN SCHOOL OF SKILLS · AI BUILDERS PROGRAM · 2026

Don't just learn *AI*. Ship it products

A 5-month, fully online live cohort where every session ends with something real — an app, a video, a workflow, a product. Zero passive learning.

Maximum real-world impact.

● 5 Levels

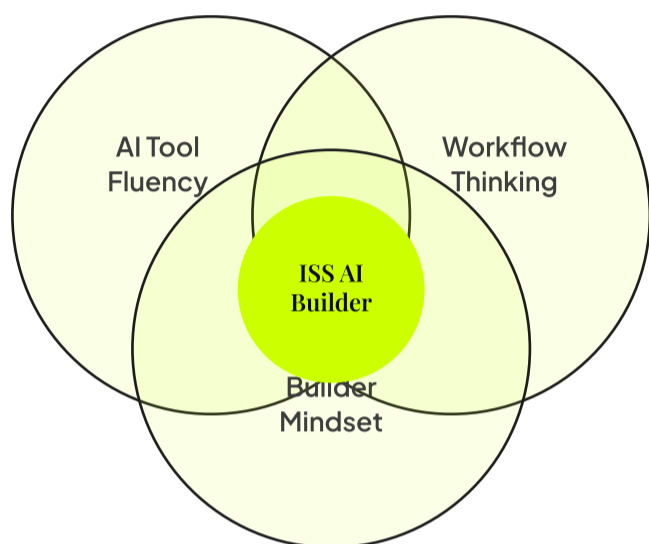

● 100% Online

● Build Real Products

● Live Demo Day

What can an AI Builder do?

AI Builders combine tool fluency, workflow thinking, and a builder mindset to ship outcomes other people can only imagine — apps, automations, videos, products.

The intersection of three skills, mastered together.

1

AI Tool Fluency

Knowing which model to use, when, and why — Claude vs GPT vs Gemini vs Perplexity — not as a casual user, but as a deliberate operator.

2

Workflow Thinking

Connecting tools into systems. Building pipelines that run without you. Automations, RAGs, agents — not one-off prompts.

3

Builder Mindset

Shipping outcomes over collecting knowledge. Every session ends with something real you can show. Proof over promises.

Who is this Program for?

STUDENT

0-2 YRS EXPERIENCE

The Ambitious Graduate

"Everyone in my batch is applying for the same roles. I need something that makes me different — fast."

Month 5 outcome: A deployed app in their portfolio — the only candidate who can demo a live product.

PROFESSIONAL

3-10 YRS EXPERIENCE

The Corporate Upgrader

"I spend 4 hours every Monday pulling reports that AI could do in 4 minutes. I need to change that."

Month 5 outcome: An automation saving 10+ hours weekly, presented at their company all-hands.

FOUNDER

ANY EXPERIENCE

The Startup Builder

"I've had this app idea for 2 years. I kept waiting until I could afford a developer. That era is over."

Month 5 outcome: A live product with real users — built, designed, and launched solo.

WHY IT MATTERS NOW

The AI Builder Way VS The Old Way

72%
OF BUSINESSES HAVE ADOPTED AI FOR
AT LEAST ONE CORE FUNCTION —
FORBES

FUNCTION	OLD WAY	AI BUILDER WAY	RESULT
 MARKETING	– Research topics manually, write drafts, schedule posts over weeks	Brief → AI research → draft → visual → scheduled in under 2 hours	10x Content Output
 DATA ANALYSIS	– Pull CSVs, clean in Excel, write reports by hand every week	AI agent ingests data, cleans, analyses, generates narrative report	Hours → Minutes
 PRODUCT & DESIGN	– Hire designer, wait for mockups, iterate slowly across sprints	Describe UI in plain English → Lovable/Bolt builds a working app	MVP in a Weekend
 FINANCE & OPS	– Manually compile expenses, track invoices, forecast by hand	AI workflow auto-categorises, flags anomalies, forecasts cash flow	Real-Time Clarity
 HR & HIRING	– Read 200 CVs manually, schedule calls, follow up individually	Agent screens CVs, ranks candidates, drafts personalised outreach	80% Time Saved
 CUSTOMER SUPPORT	– Human responds to each ticket. Response time: hours.	AI agent handles Tier-1 queries, escalates edge cases, learns over time	24/7 · Zero Cost

👉 *By the end of Month 2, you'll have built every one of these workflows yourself. Not watched a demo — actually built it and shipped it.*

ISS AI BUILDERS PROGRAM · LEVEL 2 PROMISE

AI Foundations & Prompt Mastery

Understand the terrain. Choose your tools. Build from Day 1.

MODULE 1.1

The 2026 AI Landscape

- How LLMs actually process your words — no PhD required
- The model map: Claude 4.6, GPT-5.4, Gemini 3.1 Pro, Grok 4, Perplexity — when to use each
- Context windows, tokens, and why 1M+ token models change everything
- AI users vs AI specialists vs AI builders — where you're headed

MODULE 1.2

Prompt Engineering That Works

- The ISS Prompt Formula: Role + Context + Task + Constraint + Format
- Chain-of-thought, few-shot learning, and meta-prompting
- System prompts — programming an AI assistant's entire personality
- Prompt chaining: connecting outputs into workflows

MODULE 1.3

Your First AI Agents & Automation

- Custom GPTs, Google Gems, Claude Projects — build personalised AI assistants
- MCP (Model Context Protocol) — connecting AI to your real tools
- Your first Make.com workflow: triggers, actions, filters — no code
- Connecting AI outputs to Gmail, Notion, Slack, Google Sheets

BUILD 01

Personal AI Assistant

A Claude Project with a custom system prompt and your communication style baked in.

→ **AI that writes in your voice**

BUILD 02

Prompt Library

A Notion database of 20+ tested, reusable prompts for your profession or domain.

→ **Your personal AI playbook**

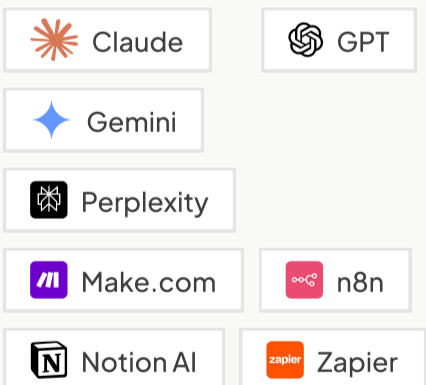

BUILD 03

First Automation

A Make.com flow that summarises emails and research articles into a Notion database.

→ **Your first system that runs while you sleep**

TOOLS YOU'LL MASTER

BY THE END OF LEVEL 1 YOU'LL BE ABLE TO ...

- ✓ Write prompts that work every time
- ✓ Build a personalised AI assistant
- ✓ Create a running 24/7 automation
- ✓ Navigate the 2026 model landscape

Workflows, RAG & Intelligent Systems

Stop doing manually what AI can do automatically.

MODULE 2.1

RAG — Connecting AI to Your Own Knowledge

- What is Retrieval-Augmented Generation and why it beats fine-tuning for most uses
- Vector embeddings explained simply: how AI finds relevant information in large document sets
- Building a knowledge assistant connected to your own files, PDFs, and documents
- NotebookLM deep dive — the most underrated AI research tool of 2026

MODULE 2.2

Content & Marketing Automation Pipelines

- The full content pipeline: idea → outline → draft → image → publish → distribute
- Building an AI newsletter engine and social media automation system
- Repurposing engine: one brief → 10 formats (thread, newsletter, blog, short video script)
- AI for SEO: keyword research, content briefs, and optimised drafts in one workflow

MODULE 2.3

Voice Agents & MCP Integration

- How voice agents work: speech-to-text → LLM → text-to-speech pipeline
- ElevenLabs, Vapi, and Bland AI — building agents that handle real phone conversations
- MCP (Model Context Protocol) — connecting Claude to Gmail, Notion, Slack, Calendar
- Building a personal AI chief of staff that manages your inbox and schedule

BUILD 01

AI Research Assistant

A RAG pipeline connected to your own documents that answers questions with citations.

→ **Never search documents manually again**

BUILD 02

Content Pipeline

Input one topic → AI outputs 5 LinkedIn posts, a newsletter edition, a blog outline, 10 video scripts.

→ **A week of content in 30 minutes**

BUILD 03

Voice Agent

A working voice agent for FAQ answering or appointment booking. Built with ElevenLabs + Vapi.

→ **AI that talks to people for you**

TOOLS YOU'LL MASTER

 NotebookLM

 Perplexity

 ElevenLabs

 Vapi

 Bland AI

 Notion AI

 Make.com

 Claude MCP

BY THE END OF LEVEL 2 YOU'LL BE ABLE TO ...

- ✓ Build a RAG knowledge assistant
- ✓ Run a full content pipeline
- ✓ Deploy a working voice agent
- ✓ Connect Claude to your real tools via MCP

AI for Visual Creation — Images, Video & Audio

Become a one-person creative studio. No team. No agency. Just you and AI.

MODULE 3.1

AI Image Generation Mastery

- Prompt anatomy for images: subject, style, lighting, composition, camera angle
- Midjourney, GPT Image (gpt-image-1.5), Gemini Nano Banana — each tool's strengths
- img2img and inpainting: editing specific parts of images without redoing everything
- Building a complete brand identity kit with AI in under 3 days

MODULE 3.2

AI Video Generation

- Google Veo 3 — the breakthrough text-to-video model with synchronised audio (2026)
- Kling AI for realistic character motion; Runway ML Gen-3 for professional editing
- Making a 60-second ad film entirely with AI: script → storyboard → video → audio → edit
- AI video for LinkedIn, YouTube Shorts, Instagram Reels — the 2026 creator workflow

MODULE 3.3

AI Audio — Voice, Music & Podcasts

- ElevenLabs voice cloning — create an AI version of your own voice
- Suno AI and Udio — generate original music from a text prompt (genre, mood, BPM)
- Building a full AI podcast: script (Claude) → voice (ElevenLabs) → music (Suno) → art (Midjourney)

BUILD 01

Brand Identity Kit

Logo concept, colour palette, typography, social templates, ad creatives — all AI-generated.

→ Agency-quality kit in 3 days

BUILD 02

60-Second Ad Film

Concept → script → AI video (Veo 3/Kling) → voiceover (ElevenLabs) → music (Suno) → final edit.

→ A real ad you can run on social

BUILD 03

AI Podcast Episode

Full episode: research → script → voice recording → music bed → cover art. Publishable.

→ A complete podcast episode

TOOLS YOU'LL MASTER

 Midjourney

 Nano Banana

 Meta AI

 Kling AI

 Runway ML

 ElevenLabs

 Suno AI

 Krea AI

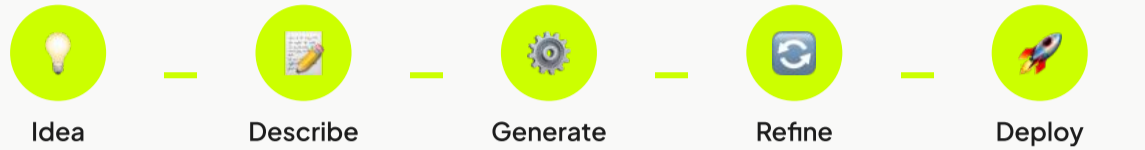

BY THE END OF LEVEL 3 YOU'LL BE ABLE TO ...

- ✓ Generate professional brand kits with AI
- ✓ Produce a complete AI ad film
- ✓ Create original voice & music
- ✓ Run a solo creative production workflow

Vibe Coding — Build Real Software

"Vibe coding" — Collins Dictionary Word of the Year 2025. Now how millions build software.

FROM IDEA TO LIVE PRODUCT

MODULE 4.1

No-Code App Builders

- Lovable — full-stack web apps from conversational prompts. Auth, database, UI included. (\$20M ARR in 2 months)
- Bolt.new — browser-based, zero setup, instant deployment. Build and share in an afternoon
- Replit — cloud-based with AI Agent mode. Best for apps needing backend logic, Stripe, APIs
- Base44, Emergent — AI applications with secure workflows and agent-driven development

MODULE 4.2

AI Code Editors & Deployment

- Cursor — VS Code with AI superpowers: multi-file editing, codebase understanding, autonomous refactoring
- Windsurf + Cascade — agentic coding that plans and executes across your entire project
- Claude Code — the coding agent powering Cursor and Windsurf, now directly available
- Deployment in under 10 minutes: Vercel, Netlify. Adding Stripe payments in under an hour

BUILD 01

Deployed SaaS MVP

Full-stack web app: user login, database, core feature, live URL. Built with Lovable or Bolt + Supabase.

→ [Your first real software product](#)

BUILD 02

Portfolio Website

Personal website showcasing all your program builds. Built with v0.dev + Vercel. Live online.

→ [Your professional AI builder profile](#)

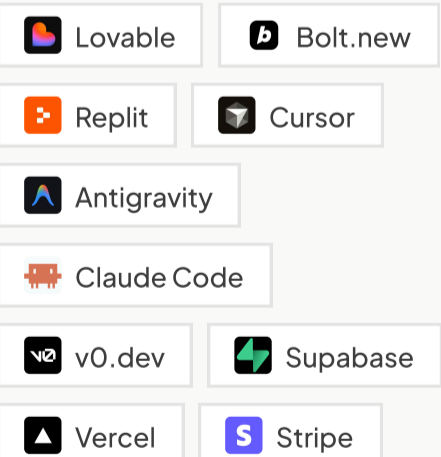

BUILD 03

Internal Business Tool

A dashboard, tracker, or tool solving a real problem at your job or in your domain.

→ [Something your team actually uses](#)

TOOLS YOU'LL MASTER

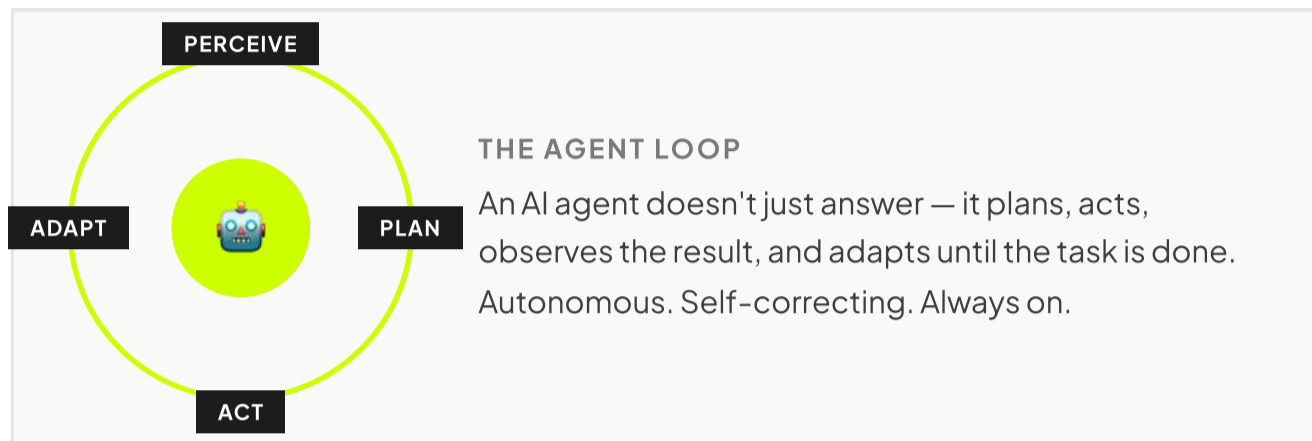

BY THE END OF LEVEL 4 YOU'LL BE ABLE TO ...

- ✓ Build & deploy a full-stack app
- ✓ Create a live portfolio website
- ✓ Integrate payments & auth
- ✓ Go from idea to live product in a weekend

AI Agents & Capstone Demo Day

Build autonomous AI systems. Then build your biggest project yet.

MODULE 5.1 — PHASE A: WEEKS 1-2

Building AI Agents

- n8n AI Agents — building agents with a visual interface, no code required
- CrewAI — orchestrating multiple specialised AI agents working together on a task
- Claude Agent Teams and Google Antigravity — multi-model orchestration in 2026
- Real-world agents: research briefing, customer support, hiring screener, sales agent

MODULE 5.2

Agentic Coding with Claude Code

- Claude Code: 80.9% SWE-bench — first model to break 80%. Handles ambiguity without hand-holding
- Cursor Agent mode — running multi-step coding tasks across your entire codebase
- The difference between AI-assisted coding (Copilot) vs fully agentic coding

BUILD 01

Daily Intel Agent

Monitors 10 news sources, summarises relevant articles, emails you a briefing every morning at 8am.

→ [Your AI morning briefing](#)

BUILD 02

Support Agent

Connected to a RAG knowledge base. Handles inbound questions, escalates unknowns, learns from feedback.

→ [24/7 customer support, zero cost](#)

CAPSTONE · WEEKS 3-4

Your Biggest Build

Choose your track: SaaS Product · AI Content Brand · Business Automation · Multi-Agent System

→ [Presented live at Demo Day](#)

TOOLS YOU'LL MASTER

Gumloop LangChain

n8n Agents

Claude Code

Antigravity

Manus AI

BY THE END OF LEVEL 5 YOU'LL BE ABLE TO ...

- ✓ Deploy a working AI agent
- ✓ Orchestrate multi-agent systems
- ✓ Use Claude Code autonomously
- ✓ Present a live product at Demo Day

Your Portfolio of Shipped Outcomes

You won't be showing a certificate. You'll be showing things you built — live products with real URLs, real automations, real creative work.

LEVEL	WHAT YOU BUILT	PROOF
01 Foundations	Personal AI Assistant + Prompt Library of 20+ templates + First automation workflow	<i>Notion workspace, live Make.com flow running 24/7</i>
02 Workflows	RAG Research Assistant + Full content pipeline + Voice agent for real conversations	<i>Live agent URL, working weekly content system</i>
03 Visual	Brand identity kit + 60-second AI ad film + Complete AI podcast episode	<i>Downloadable assets, published podcast, shareable video</i>
04 Vibe Coding	Deployed SaaS MVP + Portfolio website + Internal business tool	<i>3 live URLs on the internet. Real software.</i>
05 Agents	AI agent system + Capstone project presented live at Demo Day	<i>GitHub repo, live product, Demo Day recording</i>

FINAL STOP

ISS Demo Day

A live, public showcase where every student presents their capstone project to mentors, peers, and invited industry guests.

- 1** 5-minute live product demo — not slides, the actual thing
- 2** Q&A with ISS mentors and guest judges from industry
- 3** Public showcase — open to employers and investors

CHOOSE YOUR CAPSTONE TRACK

Product Builder

A live SaaS app with real users — built, deployed, and presented

Creator Studio

An AI-powered content brand: 4 weeks of content + a video series

Automation Architect

An end-to-end business workflow saving 10+ hours per week

Agent Builder

A multi-agent system solving a real problem with a user interface

HOW TO JOIN

3 steps to enrol in the AI Builders Program

Enrollment is selective to keep cohort quality high. No prior coding experience required. Seats are limited.

<h2>01</h2> <h3>Fill out the Application</h3> <p>A short form telling us about you, your background, and what you want to build. Takes 5 minutes.</p>	<h2>02</h2> <h3>Onboarding Call</h3> <p>A 20-minute call with our team. We learn about your goals — you learn about the program, the cohort, and next steps.</p>	<h2>03</h2> <h3>Join the Cohort</h3> <p>If it's a fit, you're in. Pricing and scholarship options are shared during the call. Cohort starts June 2026.</p>
---	--	--

Eligibility-Based Scholarships

 <h3>Academic Excellence</h3> <p>For individuals with outstanding academic performance and results.</p>	 <h3>Professional Excellence</h3> <p>For professionals with a strong and proven track record in their field.</p>	 <h3>Early Career Grant</h3> <p>For students and fresh graduates (0-1 year of experience) starting out.</p>
 <h3>Economic Grant</h3> <p>Supporting individuals with demonstrated financial constraints or need.</p>	 <h3>ISS Alumni Referral</h3> <p>For anyone referred by a current ISS student or program alumni.</p>	 <h3>Any Questions?</h3> <p>Feel free to reach us at admissions@indianschoolofskills.org</p>

Ready to build?
